%RCHANGE - Cannot save routine.

I am getting this with %RCHANGE:

RPMS 28d1>D ^%RCHANGE

This routine changes all occurrences of a string in
routines/include files.

1. Change every: Cache to: IRIS
2. Change every:

Routine(s): %*
Routine(s):

Then I get these types of messages:

This routine is mapped to another database, are you sure you want to change it??
 No => yes%DIRFULL.INT

%BENCHLANG.INT

This routine is mapped to another database, are you sure you want to change it??
 No => yes%BENCHLANG %BENCHLANG ; Benchmark for IRIS ObjectScript
 ;+9 ; A benchmark to measure relative performance of IRIS ObjectScript
 ;+15 ; stored in a IRIS database, and then exported to a CSV file. This rou
 tine
 - Cannot save routine.
