## StreamContainer.

Hello,

I make some changes in our ObjectScript code between our prod environment and dev environment in the process 'HI7AdtFileIsosIBp'.

The operation is a class with "EnsLib.TCP.TextLineOutboundAdapter".

In prod:

In dev:

Services	Processes	Operations	×	Header Body Contents	
FtpHl7FileIsoslIn	isoslIn Hi7AdtFileIsoslBp	StreamIsosIToMFOut		View Full Contents	View Raw Contents
[1] 2019-11-27 14: HL7.Message	37:28.132				
	[2]	:37:28.152			
	[3] 2019-11-2	7 14:37:28.161 NULL			

Like you can see, I don't have the contents of the text file.

I checked a lot of parameters but it seems identical.

The content of file is correctly received through TCP. So the only glitch is I don't see it in the 'View Full Contents'.

Best Regards.
