## Get certified on InterSystems IRIS Development!

Hello, Community!

After beta testing the new exam [InterSystems IRIS Core Solutions Developer Specialist](#) at Global Summit 2019, the Certification Team of InterSystems Learning Services has performed the necessary calibration and adjustments to release it to our community. It is now ready for purchase and scheduling in InterSystems [exam catalog](#).

This is InterSystems first certification exam to feature mainly code samples as question topics. To give potential candidates a sample of the exam's content, practice questions have been published to help orient to exam question approaches and content. Take a look [here](#).

Passing the exam allows you to [claim the electronic badge](#) that can be embedded in social media accounts to show the world that your InterSystems IRIS development skills are first rate. And if you aren't successful in your first attempt, we now offer a new service, Exam Retake Support, that can help you prepare for a retake. Read all about it in our [Policies](#).

If you are new to InterSystems Certification, please review our new [program pages](#) that include information on [taking exams](#), [exam policies](#), [FAQ](#) and more. Also, check out our [Organizational Certification](#) that can help your organization access valuable business opportunities and establish your organization as a solid provider of InterSystems solutions in our marketplace.

The Certification Team at InterSystems Learning Services are pretty excited about this new exam and we are also looking forward to working with you to create new certifications that can help you advance your career. We are always open to ideas and suggestions at [certification@intersystems.com](mailto:certification@intersystems.com).

Looking forward to celebrating your success,

James Kantor - Certification Manager, InterSystems
