## Creating and associating a batch class with a recordmap

Hello,

I have a record map and batch class being passed to an `EnsLib.RecordMap.Operation.BatchFileOperation`.

They are designated as `INFORMATION.FPL.Record` and `INFORMATION.FPL.Header`

After reaching the operation it errors out with this message : `ERROR <Ens>ErrGeneral: Quitting with error on Message body 5@INFORMATION.FPL.Record / 54 because Status 'ERROR <EnsRecordMap>ErrNoBatchParent: Record with class 'INFORMATION.FPL.Record' and Id '54' doesn't belong to a batch' matched ReplyCodeAction 1 : 'E=F' resulting in Action code F`

Some screen grabs are attached of my configuration.

Any help is appreciated, thanks in advance
