BridgeWorks VDM v9.1.0.1 for InterSystems Now Available

BridgeWorks is pleased to announce a VDM, v9.1.0.1. This release includes the following updates:

Updates

- Historical Linking is now based off connection profile name
- Saved Formatting is now based off connection profile name
- Tables and Fields column headers no longer hide based on connection type

Bug Fixes

- Cross tab would not load data correctly in Finished Reports Viewer if it was in a report footer
- Fixed an issue where refreshing logs would not work correctly after viewing a SQL statement
- Views were not visible for available schemas on the connection wizard

New

- Load Selected Connections
- Only load connections selected from a list
