How to Get the Property's DisplayList data of ValueList from Java

Hi All,

I trying to get the DisplayList data of the ValueList from Java using Springboot. when I try to get the DisplayList data via java code but I'm getting the VALUELIST data. I don't get any idea to get that DisplayList data. Below is the example

```
Property PetName As %Integer(DISPLAYLIST = ",Cat,Dog,Dove,Parrot", VALUELIST = ",1,2,3,4");
```

Java Code:

```
public String PetName;
```

```
public List<Pet> getPet() {  
    return ser.findAll();  
}
```

```
List<Pet> arrayList = getPet();  
for (Patient list : arrayList) {
```

```
    String pet= list.getPet();
```

```
    System.out.println("Pet Name --->" + pet);
```

```
}
```

If PetName value is 2 I am getting output 2 not "Dog". Which means it return the interger value not the string value. So how to get that. Please help me...

Thanks,

Vikram
