VISM.OCX in Delphi

Please suggest me.

I use delphi to develop and import VISM.OCX to component in delphi.

I run My Qurey Code in terminal get data many line but in VisM1.PLIST get data One line.

This is my code.
```
 VisM1.MServer := 'IP and Port My Server';
 VisM1.NameSpace := 'My Namespace';
 VisM1.Execute('My Qurey Code');

 VisM1.PLIST;
```
