
Question

[Scott Roth](#) · Jan 10, 2020

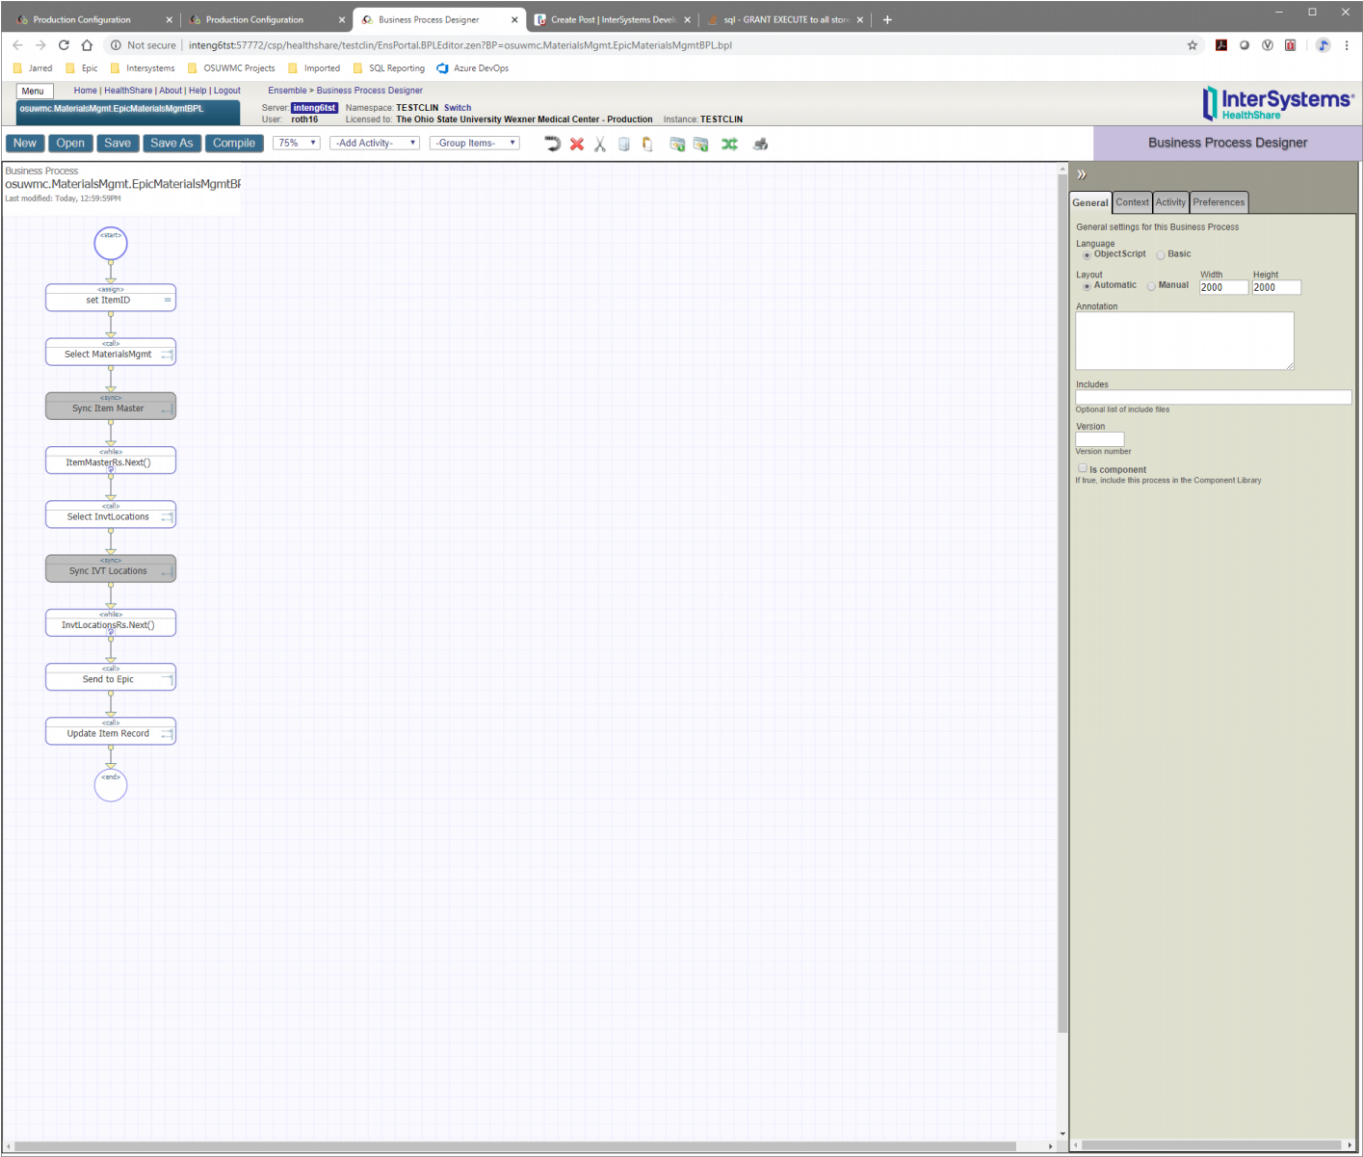

Remote Gateway Error: JDBC Gateway SP execute(0) error 0: Access to the remote server is denied because no login-mapping exists.

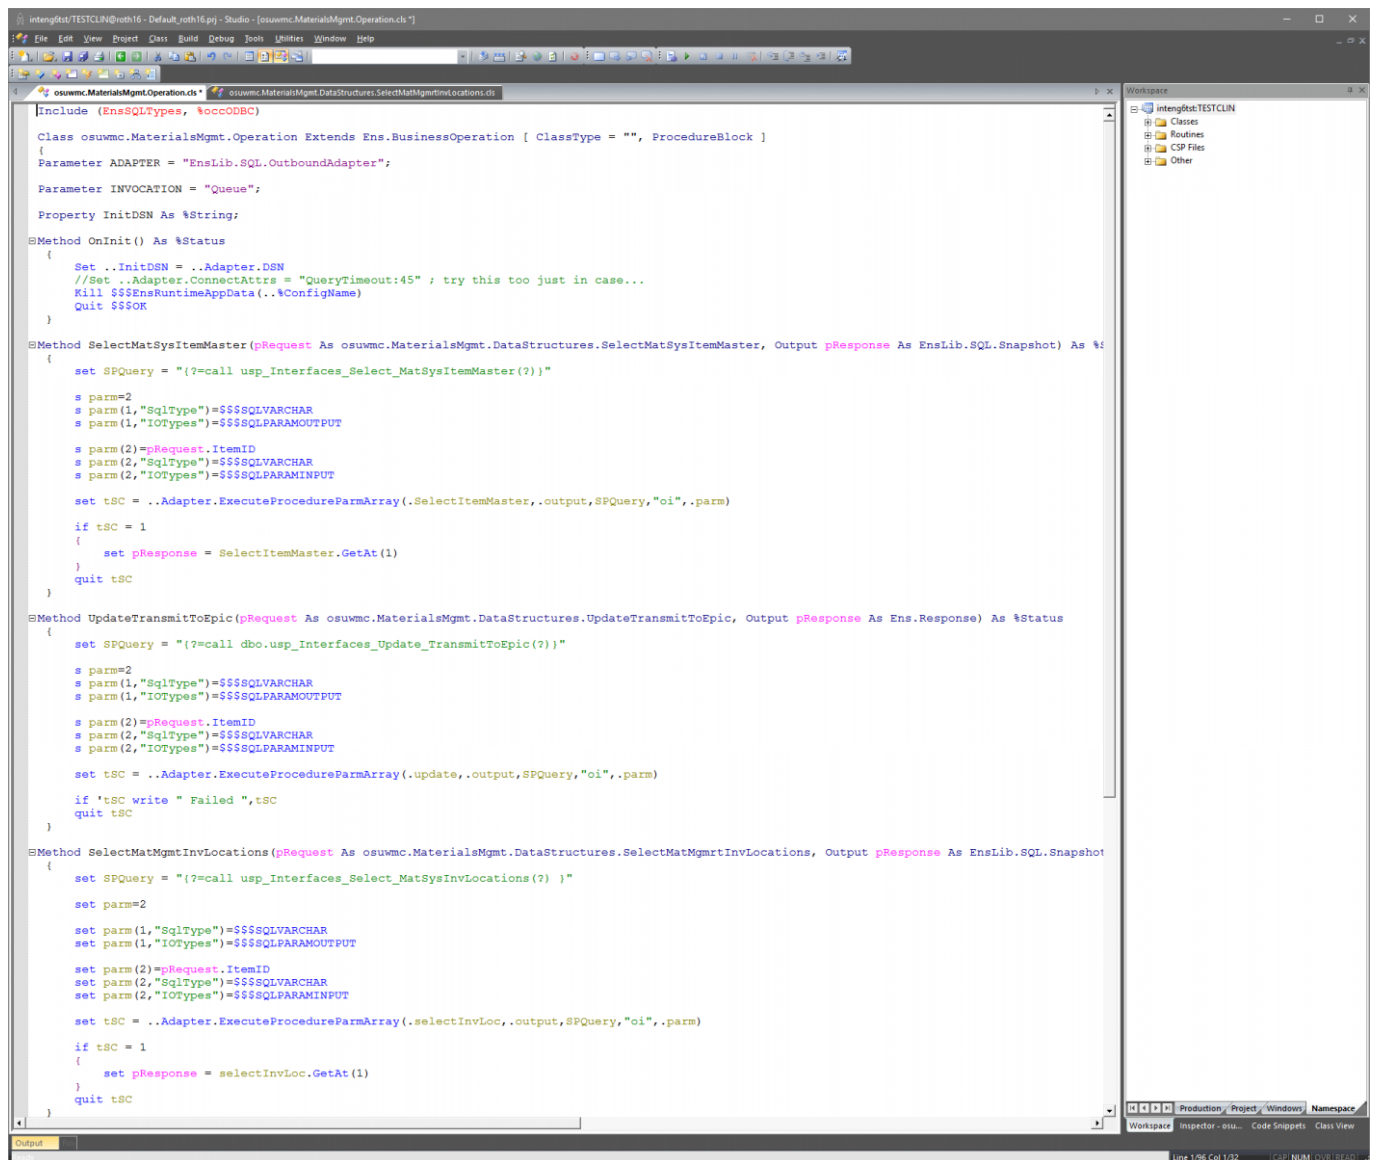

I am working on a BPL to take data from a MS SQL database and create an HL7 Materials Message for our EMR. I have done this plenty of times in the past however I am running into an error.

"Remote Gateway Error: JDBC Gateway SP execute(0) error 0: Access to the remote server is denied because no login-mapping exists."

What is confusing is that this BPL doesn't differ from any of my other BPLs in connecting to MS SQL Server. I know I am missing something..

This BPL will execute the 1st Stored Procedure without any issues, the issue is when it comes to executing the second stored procedure.

Gateway Connection		Server: inteng61st	Namespace: %SYS
User: roth16	Licensed to: The Ohio State University Wexner Medical Center - Production	Instance: TESTCLIN	

Use the form below to edit a gateway connection:

Type of connection: JDBC

Connection name:

User:

Password:

Driver name:

URL:

Class path:
(May be a comma separated list if multiple jar files are required.)

Properties:

Do not use delimited identifiers by default: ☐

Use COALESCE: ☒

Use NVL() instead of IFNULL(): ☐

Conversion in composite Row IDs: ☐ Do not convert non-character values
☐ Use CAST as VARCHAR
☐ Use CAST as CHAR
☒ Use {fn convert ...}

Any help would be appreciated.
