## Convergent Analytics goes public

[This repository](#) is a go-public that builds on the already existing InterSystems-internal Convergent Analytics community and InterSystems-private MLToolkit repo (remains active and contains the most recent information for external ML Toolkit users - request membership by writing us at [MLToolkit@intersystems.com](mailto:MLToolkit@intersystems.com)). This repo embraces more than ML Toolkit, we would like to host any discussions, publications, projects that add up in what we call convergent analytics approach. Welcome!
