<PROPERTY DOES NOT EXIST>

Hi,

I am using IRIS for Windows (x86-64) 2019.1.1

I have.

1. Created a BS with SQL Inbound Adapter which successfully connects and gets rows from DB .
2. Created a request message is populated with results of SQL query.
- 3 Created a BP with HL7 Router + Routing Rule + Transformation + Send to Target (BO).
- 4 . Created BO sending HL7 to file.

i am getting the following error.

```
ERROR <Ens>ErrorException: <PROPERTY DOES NOT  
EXIST>zOnRequest+1^EnsLib.MsgRouter.VDocRoutingEngine.1 *DocType,Test.SQLtoHL7Req -- logged as '-'  
number - @"
```

What am i missing

Thanks.
