New Podcast: Optimizing Your SQL Performance

In Episode 4 of [Data Points](#), we welcome [@Benjamin De Boe](#) to the pod to discuss some of the things you can do to optimize your SQL queries in InterSystems IRIS. We've all heard — either from ourselves or from others — the "this runs too slowly" complaint. I thought Benjamin did a great job walking through many of the things within IRIS you can look at with your queries to see what can be improved.

For more information and to subscribe on your favorite podcast app, head over to <https://datapoints.intersystems.com>. There, you can also find the previous three episodes released earlier in February. Let us know what you think!
