Quote Numbers in Json Stream

Hello Community,

My InterSystems Caché Version: 1.2014 (Can't update now.)

I have the following issue:

I have for example an articlenumber with 15049950, which is numeric. But sometimes it can also be an alphanumeric string like PK15049950.

How can i set numbers always to string in Json Stream with quotes like "15049950".

Code Example:

```
set object = ##class(%ZEN.proxyObject).%New()
```

```
set articlenumber = "15049950"
```

```
set object.articlenumber = articlenumber
```

```
set x = ##class(%ZEN.Auxiliary.jsonArrayProvider).%WriteJSONStreamFromObject(.json,object)
```

Will output:

```
{  
  "articlenumber": 15049950  
}
```

but I want always:

```
{  
  "articlenumber": "15049950"  
}
```

Thank you and best regards!
