InterSystems Developers Community Release, March 2020

Hi Developers!

In February we introduced into Developers Community:

- Autosaved drafts;
- Open Exchange linkage;
- PDF attachments;
- Weekly Unanswered questions digest;
- language-specific search;
- bug fixes and small enhancements.

See the details below.

Autosaved drafts

Sometimes when we create a long post directly on Developers Community we can accidentally close the page or browser and lose the draft text. This release comes with the feature of the autosaved draft. Every 10 seconds DC autosaves the draft you are working with and if you close the page it will suggest you restore the draft when you click Create Post again.

WYSIWYG

This form was autosaved on Tue, 03/03/2020 - 01:15 [Ignore](#) [Restore](#)

Ask a Question

Open Exchange Linkage

Starting from this release your member profile page has the direct link to your Open Exchange profile and shows your published applications.

E.g. here is the @Peter.Steiwer's members page:

[PortletSamples](#)
[JSONExportManyToMany](#)
[ObjectScript-Math](#)

PDF attachments

"You asked about it - and we did it!" This release comes with the option to attach pdf file to any post. There is a special control that gives you the option to upload a PDF file from you machine and DC will host it:

Attache PDF File

File Upload

Choose file

No file chosen

Upload

Files must be less than 50 MB.

Allowed file types: pdf.

File Summary

And you can give it a description.

Weekly Unanswered questions digest

Starting from the current release we introduce a new weekly Unanswered Questions Digest which will be sent on Wednesdays. It will contain questions that either don't have any reply or have replies but no accepted as an answer by its author. Questions are split by categories.

You can subscribe or unsubscribe from it in your Member->Subscriptions settings:

Automatically subscribes you to comments and posts you commented.

☒ **Monthly Developer Community Digest**

Subscribe to Developer Community Monthly Digest of Articles and Announcements.

☒ **Weekly Posts Digest**

Subscribe to Developer Community Weekly Digest.

Language-specific search

We fixed it. With this release if you search for something in the English community all the results will be for the English-speaking site. And the search on the Spanish community will give you the posts only in Spanish.

Small enhancements

We also fixed a few issues and did a couple of minor enhancements, like additional "Creation Date" sorting for posts to show the posts feed in a publishing date order, not last reply order:

The screenshot shows the top navigation bar with 'POSTS' and 'NEWS' tabs. Below the navigation bar, there are three filters: 'Posts: All', 'Sorting: By Date', and 'Period: All'. The 'Sorting: By Date' dropdown menu is open, showing five options: 'By Date' (selected), 'By Creation Date', 'By Replies', 'By Votes', and 'By Views'. The background shows a list of posts, with the first one titled '[2020] Conferencia 2020 in Madrid'.

Also if you forgot to give a reply an "Accepted" sign we made a special filter for your questions "Without accepted answer":

Posts

Articles (67) Questions (80) **Without accepted answer (7)** Announcements (189) Discussions (10) All (376)

🔗 What do You do With Your InterSystems IRIS Fork Repository if Your PR is accepted?

Change management, Development Environment, Git, ObjectScript, InterSystems IRIS

Hi developers!

Just want to check with you on best practices for that.

You collaborate for InterSystems IRIS repository. You fork it, then make changes, commit, push, pull request, discuss(if any), your PR is accepted.

What's next?

Do you delete the repository you forked in?

Here is [the full kanban of solved issues in February 2020](#). Here is the planned [kanban for March 2020](#).

Submit your ideas, bug fixes, contribute to Developers Community and stay tuned!
