New Coding Talk: How to Enable Docker and VSCode to Your InterSystems IRIS Solution

Hi Community!

New "Coding Talk" video is already on [InterSystems Developers YouTube](#):

[How to Enable Docker and VSCode to Your InterSystems IRIS Solution](#)

In this video, presented by [@Evgeny Shvarov](#), you will learn how to add InterSystems IRIS Docker and VSCode environment to your current repository with InterSystems ObjectScript using [iris-docker-dev-kit](#) project on Open Exchange.

[iris-docker-dev-kit](#) – a set of files to facilitate development with InterSystems IRIS using Docker and VSCode. It gives you the option to develop your InterSystems ObjectScript solution in IRIS Community Edition or IRIS Community Edition for Health on your laptop using VSCode ObjectScript extension.

And...

You're very welcome to watch all Coding Talks in a [dedicated "Coding Talks" playlist](#) on our [InterSystems Developers YouTube Channel](#).

Stay tuned!
