Webinar in Russian: Best Practices of In-Platform AI/ML

Hey Developers,

We're pleased to invite you to the upcoming webinar "Best Practices of In-Platform AI/ML" by InterSystems on April 3rd at 10:00 (UTC+3, Moscow time)!

The use of machine learning and artificial intelligence technologies in production environment is impossible without a platform that ensures the functioning autonomy of AI/ML mechanisms. Platform-centric AI/ML implementation offers a number of advantages. Reap them following InterSystems best practices.

The following topics are on the agenda:

- Full cycle development of AI/ML content on InterSystems IRIS Data Platform (including bi-directional Jupyter integration with InterSystems IRIS).
- New to the ML Toolkit: Integration and orchestration of the new mathematical modeling environment - Julia.
- Automatic selection and parameterization of AI/ML models in the SQL query.
- Implementation example: automatic comparison of nomenclature directories and price-lists from our partner Escape.

Audience: The webinar will be useful to everyone who is interested in the production-grade implementation of machine learning and artificial intelligence technologies.

Speakers:
@ Eduard Lebedyuk, Sales Engineer, InterSystems
@ Sergey Lukyanchikov, Sales Engineer, InterSystems
@ Aleksandr Kalinin, Software Engineer, Escape

Note: The language of the webinar is Russian. Please comment if you want this webinar in English!
