[isc-generate-db] One line command to create your new Database

Hi Developers!

Create Database, Namespace, REST Applications using Portal Management is an easy task. You just need a few clicks or maybe more clicks than you expect.

But, what if you traded all those clicks for a simple command-line ?!

```
IRISAPP>do ##class(diashenrique.Utils.GenerateDB).CreateNew
```

You just need to answer a few questions:

```
Do you want to create a new Database/Namespace? (Y/N) :

Choose your Namespace name :
Choose the Dataset location <Path Default is mgr directory> :
Make this an Interoperability namespace? (Y/N) :
Do you want to split the database into CODE/DATA? (Y/N) :
Create a REST Application? (Y/N) :
```

With [isc-generate-db](#), even this duo can do that 😃

If you like it, you can vote for isc-generate-db on the InterSystems IRIS Contest
