## StreamLocation doesnt seem to affect where streams are stored

Hi-

I have a class that specifies that streams should be stored in SSA.DocumentCacheS, however, they are getting stored in CacheStream instead.

How can I get streams to properly store in SSA.DocumentCacheS?

Here's the section from my storage definition that shows the StreamLocation

```
<DataLocation>^SSA.DocumentCacheD</DataLocation>
<DefaultData>DocumentCacheDefaultData</DefaultData>
<IdLocation>^SSA.DocumentCacheD</IdLocation>
<IndexLocation>^SSA.DocumentCacheI</IndexLocation>
<StreamLocation>^SSA.DocumentCacheS</StreamLocation>
<Type>%Storage.Persistent</Type>
```

But when I look at the globals created:

```
Global ^SSA.DocumentCacheD
^SSA.DocumentCacheD
("997ey01BWB")=$lb(" ", $lb($lb($c(0,19,
1,14,1)_"^CacheStream"_$c(3,4,2,2,1), , "^CacheStream
")), $lb("Bronchitis.tiff"), $lb("8416350"))
```

```
Global ^SSA.DocumentCacheS [Global does not exist]
Global ^
```

Any thoughts on where I went wrong?

Thanks
