New Video: A Skeptics Guide to Containers

Hi Community!

The new video from Global Summit 2019 is already on [InterSystems Developers YouTube](#):

[A Skeptics Guide to Containers](#)

It's okay to be skeptical. Containers are different from what developers are used to, which can cause problems when you're getting started. This video explores container-related topics such as persistence, isolation, Linux, and more. We will discuss how these elements actually work and how they may affect your software.

Takeaway: You will learn how challenges associated with starting to use containers will ultimately be beneficial to their business.

Presenter: [@Conor Walsh](#), Support Developer, InterSystems

Additional materials to this video you can find in this [InterSystems Online Learning Course](#).

If you would like to explore a wider range of topics related to this video, please use the Resource Guides below:
