## CSP Translation

Hi guys,

I have read thos two links how to translate CSP application

[https://cedocs.intersystems.com/latest/csp/docbook/DocBook.UI.Page.cls?KEY=GCSP\\_localization\\_tags#GCSP\\_localization\\_tags\\_compile](https://cedocs.intersystems.com/latest/csp/docbook/DocBook.UI.Page.cls?KEY=GCSP_localization_tags#GCSP_localization_tags_compile)

[https://cedocs.intersystems.com/latest/csp/docbook/DocBook.UI.Page.cls?KEY=ASTRLOC#ASTRLOC\\_localization\\_util\\_export](https://cedocs.intersystems.com/latest/csp/docbook/DocBook.UI.Page.cls?KEY=ASTRLOC#ASTRLOC_localization_util_export)

I have exported strings to XML

```
<?xml version="1.0" encoding="UTF-8"?>

<MsgFile Language="sk">

    <MsgDomain Domain="webshop">

        <Message Id="39797752">Môj úet</Message>

        <Message Id="124909007">Kontakujte nás</Message>

        <Message Id="207152028">Obchod</Message>

        <Message Id="223152381">${description}</Message>

        <Message Id="766317539">Jazyk</Message>

        <Message Id="1300400609">Odhlásiť sa</Message>

        <Message Id="2256300634">O nás</Message>

        <Message Id="2418076265">Mena</Message>

        <Message Id="3900507555">Potrebujete poradič?</Message>

        <Message Id="4097111893">Hotline:</Message>

    </MsgDomain>

</MsgFile>
```

However on my webpage special characters are not shown correctly. I have html lan set to SK, also metacharset is set to UTF-8 and in my webpage are string like this " Odhl si? sa, M j ?et

This is code in HTML

```
<csp:text language="#(%session.Data("language"))#">My Account</csp:text>
```
