Support for Standards built in? FHIR I know is supported, how about OAGIS, FERPA CEDS, PSD2/SWIFT, NIEM?

Hello,

I was wondering if InterSystems has support for the following standards built into IRIS or Health Connect / Ensemble:

1. Healthcare FHIR(Fast Healthcare Interoperability Resource) Protocol
(Electronic Prescription Service) (Open Application S10 EPCIS
Data Exchange), Certification, Credentials FERPA CEDS (Common Education
Worldwide Banking PSD2/SWIFT (Payment Services Directive/Society for
Exchange FedEx, State and Local Government NIEM (National Information

If not, has anybody utilized Iris or Ensemble for these kind of messages?

Thanks,

Oliver
