## InterSystems IRIS 2020.1 Tech Talk: Data Science, ML & Analytics

Hi Community,

We're pleased to invite you to join the upcoming [InterSystems IRIS 2020.1 Tech Talk: Data Science, ML & Analytics](#) on April 21st at 10:00 AM EDT!

In this first installment of InterSystems IRIS 2020.1 Tech Talks, we put the spotlight on data science, machine learning (ML), and analytics. InterSystems IntegratedML™ brings automated machine learning to SQL developers. We'll show you how this technology supports feature engineering and chooses the most appropriate ML model for your data, all from the comfort of a SQL interface. We'll also talk about what's new in our open analytics offerings. Finally, we'll share some big news about InterSystems Reports, our "pixel-perfect" reporting option. See how you can now generate beautiful reports and export to PDF, Excel, or HTML.
