How to issue correct paging query to get dataset from external database

Hi,

I issue a sql like follow:

select *, %vid from (select * from orderinfo) where %vid between 1 and 10

I got error

 [SQLCODE: <-400>:<Fatal error occurred>]

  [%msg: <Remote JDBC error: ORA-00911: invalid character >]

So ,what's the correct paging syntax for query external data?

Tks.

#SQL #Caché
