Get VSCode to look like Studio

One of the things I want from VSCode is to have a familiar Studio look.

Thankfully VSCode is easily customizable so you can choose any color for any element.

Here's what I got so far:

```
Form > Test > Person.cls > Form.Test.Person
1  /// Test form: Person
2  Class Form.Test.Person Extends (%Persistent, Form.Adaptor, %Populate)
3  {
4
5  /// Comment
6  Parameter FORMNAME = "Person";
7
8  Parameter OBJPERMISSIONS As %String = "CRUD";
9
10 Parameter SETTINGS = "PythonLib:Basic,Initializer:Basic:selector?context={isc.py.ens.ContextSearch/SubclassOf?class=isc.py.init.Abstract}";
11
12 /// Person's Date of Birth.
13 Property dob As %Date(DISPLAYNAME = "Date of Birth", POPSPEC = "Date()");
14
15 Debug this method
16 ClassMethod queryLIST() As %String
17 {
18 | Quit "id, name, dob, age "
19 }
20
21 /// Name is a field used as a basic info about this form object
22 Parameter DISPLAYPROPERTY As %String = "name";
```

To get the same look add to your settings.json:

```
"workbench.colorTheme": "Default Light+",
"editor.tokenColorCustomizations": {
  "textMateRules": [
    {
      "scope": "entity.other.attribute-name.objectscript_class",
      "settings": {
        "foreground": "#000000"
      }
    },
    {
      "scope": "string.quoted.double.objectscript",
      "settings": {
        "foreground": "#068306"
      }
    },
    {
      "scope": ["comment.block.documentation.objectscript_class"],
      "settings": {
        "foreground": "#040482"
      }
    }
  ]
}
```

Get VSCode to look like Studio
