New Video: System Alerting and Monitoring Made Easy

Hi Community!

The new video from Global Summit 2019 is already on [InterSystems Developers YouTube](#):

[System Alerting and Monitoring Made Easy](#)

In this video, we will demonstrate InterSystems IRIS System Alerting and Monitoring (SAM). SAM is a new "out of the box" capability that provides a single view of your InterSystems IRIS systems. Tracking alerts and key performance indicators (KPIs) over time enables you to take action before your systems are stressed.

Takeaway: You will learn how to use SAM to keep tabs on the performance of their applications.

Presenters:

[@Murray Oldfield](#), InterSystems Technology Architect

[@Luca Ravazzolo](#), InterSystems Product Manager

Additional materials to this video you can find in this [InterSystems Online Learning Course](#).

Stay tuned!
