## Webinar: Enterprise-grade Source Code Management

Hi Community!

We're pleased to invite all the developers to the upcoming "Enterprise-grade Source Code Management" webinar on May 21st at 11:00 AM EDT.

You will learn how Deltanji from [George James Software](#) can control large scale InterSystems applications throughout the development, testing, deployment and maintenance cycle.

Presenters:

[@George James](#), CEO, George James Software

[@John Murray](#), Senior Product Engineer, George James Software

What is Deltanji and what will be demonstrated at this webinar?

Deltanji is a flexible, sophisticated and widely used tool for source code versioning and deployment. Its highly configurable workflow and extensible architecture are particularly suitable for teams handling large codebases. We will demonstrate Deltanji managing code across multiple InterSystems platforms, moving it through a develop-test-deploy-fix workflow, and fully integrated with editors including Visual Studio Code, InterSystems Portal and Studio.

Audience: The webinar is aimed at anyone developing and deploying on InterSystems IRIS, HealthShare, Ensemble or Cache platforms, including legacy versions.

Webinar Resource:

- [Deltanji project on Open Exchange](#)

We are waiting for you at this webinar supported by InterSystems!

Date: Thursday, May 21, 2020

Time: 11:00 AM EDT
