Invalid claspath in IRIS demo?

Hi again!

I logged into the demo IRIS again, and for some reason, today, I had an "Classpath is incomplete" warning message. The classpath is defined under quickstarts-multimodel-java. Here is the contents of the file :

```
<?xml version="1.0" encoding="UTF-8"?>
```

```
<classpath>
```

```
  <classpathentry kind="src" path="src"/>
```

```
  <classpathentry kind="lib" path="lib/intersystems-jdbc-3.0.0.jar"/>
```

```
  <classpathentry kind="lib" path="lib/intersystems-xep-3.0.0.jar"/>
```

```
  <classpathentry kind="con" path="org.eclipse.jdt.launching.JRE_CONTAINER/org.eclipse.jdt.internal.debug.ui.launcher.StandardVMType/JavaSE-1.8"/>
```

```
  <classpathentry kind="output" path="bin"/>
```

```
</classpath>
```

What am I missing? Does it have anything to do with my attempt to download Docker? Is it because I've linked it to an Eclipse instance, or a personal cache instance?

Thanks.
