Intersystems API Manager(IAM) installation issues

I am trying to install IAM in my local and I downloaded IAM-0.34-1-1.tar.gz and extracted. I went to the location where iamimage.tar is available and run below command in the command prompt.

```
C:\ESB\HC\IAM-0.34-1-1\tar\IAM-0.34-1-1\IAM>docker load -i iamimage.tar  
unsupported os linux
```

Getting unsupported os Linux issue. Kindly let me know if anyone had this issue. Thanks!
