New Video: Developing Progressive Web Apps

Hi Developers,

Enjoy watching the new video on [InterSystems Developers YouTube](#):

[Developing Progressive Web Apps](#)

What if you could write a single JavaScript app and deploy it on web, iOS, and Android, while still getting all the benefits of a native app, such as fast loading, caching, offline usage, and an icon on your phone screen? That's what progressive web apps technology offers. Watch this video and learn about progressive web apps and see how to build one.

Takeaway: InterSystems IRIS supports all the technologies needed to build progressive web apps.

Presenter: [@Raj Singh](#), Product Manager - Developer Experience, InterSystems

Additional materials to this video you can find in this [InterSystems Online Learning Course](#).

Enjoy and stay tuned!
