## InterSystems IRIS 2020.1 Tech Talk: DevOps

Hey Developers,

We're pleased to invite you to join the next [InterSystems IRIS 2020.1 Tech Talk: DevOps](#) on June 2nd at 10:00 AM EDT!

In this [InterSystems IRIS](#) 2020.1 Tech Talk, we focus on DevOps. We'll talk about InterSystems System Alerting and Monitoring, which offers unified cluster monitoring in a single pane for all your InterSystems IRIS instances. It is built on Prometheus and Grafana, two of the most respected open source offerings available.

Next, we'll dive into the InterSystems Kubernetes Operator, a special controller for Kubernetes that streamlines InterSystems IRIS deployments and management. It's the easiest way to deploy an InterSystems IRIS cluster on-prem or in the Cloud, and we'll show how you can configure mirroring, ECP, sharding and compute nodes, and automate it all.

Finally, we'll discuss how to speed test InterSystems IRIS using the open source [Ingestion Speed Test](#). This tool is available on InterSystems Open Exchange for your own testing and benchmarking.

TECH TALK

# InterSystems IRIS 2020.1 DevOps

**Luca Ravazzolo**  
Product Manager  
InterSystems

**Bob Kuszewski**  
Product Manager  
Developer Experience  
InterSystems

**TUESDAY, JUNE 2, 2020**  
10:00 AM EASTERN DAYLIGHT TIME

**REGISTER**

 **InterSystems**  
Creative data technology

Speakers:

[@Luca Ravazzolo](#), InterSystems Product Manager

[@Bob Kuszewski](#), InterSystems Product Manager - Developer Experience

Date: Tuesday, June 2, 2020

Time: 10:00 AM EDT
