New Video: Leveraging Containers for DevOps

Hi Community,

The new video from Global Summit 2019 is already on [InterSystems Developers YouTube](#):

[Leveraging Containers for DevOps](#)

This video provides a practical example of how awinta uses containers to enable their DevOps and SecOps pipelines. Moving to a containerized, automated model has enabled awinta to focus on developing great software instead of synchronizing multiple geographically separated development teams.

Takeaway: Containers enable the continuous delivery of applications.

Presenters:

[@Michael Braam](#), Senior Sales Engineer, InterSystems

[@Ralf.Spielmann](#), [awinta GmbH](#)

Dr. Marko Woell, [awinta GmbH](#)

Additional materials to this video you can find in this [InterSystems Online Learning Course](#).

Enjoy watching this video!
