New Video: Resilient Deployments in the Cloud

Hi Developers,

Enjoy watching the new video on [InterSystems Developers YouTube](#):

[Resilient Deployments in the Cloud](#)

In this video, we will discuss options for resilient deployments informed by AWS, Azure, and GCP reference architectures, customer requirements, and geographical constraints.

Takeaway: InterSystems technologies provide various options for building resilience into cloud deployments.

Presenter: [@Ray Wright](#), Technology Architect, InterSystems

Additional materials to this video you can find in this [InterSystems Online Learning Course](#).

If you would like to explore a wider range of topics related to this presentation, please use the Resource Guides below:
