calling AIX command failed

I can run the following commands from the AIX command line prompt without any problem

```
-bash-2.05b$ echo t
t
-bash-2.05b$ echo æ
æ
```

When I call from insider cache, I have problem.

```
USER>D $ZF(-1,"echo t")
t
```

```
USER>D $ZF(-1,"echo æ")
```

```
D $ZF(-1,"echo æ")
^
```

```
<TRANSLATE>
```

I am using cache 2017.2. Can someone shed some light?

Thank you.
