InterSystems IRIS Advanced Analytics and InterSystems IRIS for Health Advanced Analytics preview is published

Preview releases are now available for InterSystems IRIS Advanced Analytics, and InterSystems IRIS for Health Advanced Analytics! The Advanced Analytics add-on for InterSystems IRIS introduces IntegratedML as a key new feature.

The build number for these releases is: 2020.3.0AA.331.0

Full product installation kits, container images, and evaluation license keys are available via the WRC's [preview download site](#).

Community Edition containers can also be pulled from the Docker store using the following commands:

- docker pull store/intersystems/iris-aa-community:2020.3.0AA.331.0
- docker pull store/intersystems/irishealth-aa-community:2020.3.0AA.331.0

Advanced Analytics is an add-on to InterSystems IRIS, and introduces **IntegratedML**, a new feature that brings "best of breed" machine learning to analysts and developers via simple and intuitive SQL syntax. Developers can now easily train and deploy powerful predictive models from within InterSystems IRIS, right where their data lives. Future versions of Advanced Analytics will comprise additional features and third-party components for advanced machine learning and analytics functionality. This release includes documentation for IntegratedML as a [User Guide](#). See also content about IntegratedML on the Learning Services [IntegratedML Resource Guide](#).
