New Video: Automated InterSystems IRIS Cloud Scaling

Hi Community,

The new video from Global Summit 2019 is already on InterSystems Developers YouTube:

Automated InterSystems IRIS Cloud Scaling

Auto-scaling, the ability to automatically adjust resources to match load requirements, is a major benefit of cloud technology. In this video, we will show approaches to automatic scaling in the cloud using ECP and data sharding. Examples will include using the auto-scale features of AWS, GCP, and Azure.

Takeaway: InterSystems IRIS provides several ways to take advantage of auto-scaling.

Presenter: @ Ken Takemura, Performance Specialist, InterSystems

Additional materials to this video you can find in this InterSystems Online Learning Course.

If you would like to explore a wider range of topics related to this presentation, please use the Resource Guides below:
