New Video: In-Place InterSystems IRIS Conversions

Hi Community,

The new video from Global Summit 2019 is already on InterSystems Developers YouTube:

In-Place InterSystems IRIS Conversions

This video provides more detail about the process of converting an existing installation of a Caché/Ensemble-based application to InterSystems IRIS. We will give an overview of the process and do a live demonstration of converting a mirrored deployment.

Takeaway: Caché and Ensemble can co-exist with InterSystems IRIS, which makes it easier to do in-place conversions.

Presenter: @ Andreas Dieckow, Principal Product Manager, InterSystems

Additional materials to this video you can find in this InterSystems Online Learning Course.

If you would like to explore a wider range of topics related to this presentation, please use the Resource Guides below:
