SFTP connect

Hello,

I'm trying to upload file to SFTP server.

I have access to SFTP server .

My code is bellow

```
Try {
Set sftp = ##class(%Net.SSH.Session).%New()

Set sc = sftp.AuthenticateWithUsername(username,password)
if 'sftp.Connect(host){
    Set status = $$$ERROR($$$GeneralError,"Cannot connect to sftp ")
    Quit
}

Set sc = sftp.OpenSFTP(.t)

If 'sftp.Disconnect() Write "Failed to logout",!

} Catch ex {
Set status=$$$ERROR($$$GeneralError,$ZE)
Quit
}
```

The output : \$!b(5001,"Cannot connect to sftp "

What i'm doing wrong ?
