InterSystems IRIS 2020.1 Tech Talk: Speed Under Pressure

Hey Community,

We're pleased to invite all the developers to the upcoming [InterSystems IRIS 2020.1 Tech Talk: Speed Under Pressure](#) on July 14 at 10:00 AM EDT!

In this InterSystems IRIS 2020.1 Tech Talk, we'll learn about the open source [Ingestion Speed Test](#). We will explain:

- the architecture of the ingestion speed test
- how we are leveraging Docker containers to run it on our PCs
- how we are leveraging InterSystems Cloud Manager to easily run it on AWS so we can compare InterSystems IRIS with other databases, such as AWS Aurora

After this Tech Talk, you'll be able to use the [Ingestion Speed Test](#) on InterSystems Open Exchange for your own testing and benchmarking.

TECH TALK
