New Podcast: User Experience at InterSystems

In Episode 11 of Data Points, UX designer @ Ksenia Samokhvalova joins the podcast to talk about the approach to user experience at InterSystems, how it may differ from commonly considered UX concepts, and what her team is doing to constantly improve usability with the developer's goals in mind. If you'd like to take a quick survey to get involved with UX testing for InterSystems technologies, you can do that here!

Have any topics you've been wanting to hear discussed on Data Points? Leave them in the comments and we can try to work those topics into upcoming episodes!
