Get count of substrings within a string

I have a code tag that performs some logic in a DTL, and want to add to it the ability to find the number of substrings delimited by a dollar sign ($) within a particular string. I have tried the following which compiles just fine, but generates an error when testing in the Data Transformation Builder.
 set lineCount = $DCOUNT(reportBody,"$")

ERROR <Ens>ErrException: <SUBSCRIPT>zTransform+985^LH.IAMON.IAMONORU1XsformDTC2.1
*DCOUNT() Encoded subscript 1 > 511 bytes -- logged as '-' number - @ ' set lineCount = DCOUNT(reportBody,"$")'
