## New Column in table showing with 1840-12-31 00:00:00

Hi:

We added a column to a table as follows

Property SentTime As Ens.DataType.UTC;

And the code to populate this

```
if pStatus = "SENT" //set SentTime which is used in the Tableau Report
{
Set doc.SentTime = $$$timeUTC
}
```

For Historical records of type "Rejected" the Sent time is appearing though as 1840-12-31 00:00:00, we don't know why. Current docs work fine with this column just historical seems to display the default instead of blank/null.
