# InterSystems IRIS and IRIS for Health 2020.2 are GA (Generally Available)

GA releases are now published for the 2020.2 version of InterSystems IRIS, IRIS for Health, and IRIS Studio!

A full set of containers for these products are available from the [WRC Software Distribution site](#), including community editions of InterSystems IRIS and IRIS for Health.

The build number for these releases is 2020.2.0.211.0.

InterSystems IRIS Data Platform 2020.2 provides an important security update with the following enhancements:

- Support for TLS 1.3
- Support for SHA-3

InterSystems IRIS for Health 2020.2 includes all of the enhancements of InterSystems IRIS. In addition, this release includes:

- FHIR R4 Data transformations
- New configuration UI for the FHIR Server
- Support for IHE RMU Profile
- IHE Connectathon Updates

As this is a CD (Continuous Delivery) release, many customers may want to know the differences between 2020.2 and 2020.1. These are listed in the release notes:

- InterSystems IRIS 2020.2 [release notes](#)
- IRIS for Health 2020.2 [release notes](#)

Documentation can be found here:

- InterSystems IRIS 2020.2 [documentation](#)
- IRIS for Health 2020.2 [documentation](#)

InterSystems IRIS Studio 2020.2 is a standalone development image supported on Microsoft Windows. It works with InterSystems IRIS and IRIS for Health version 2020.2 and below, as well as with Caché and Ensemble.

The platforms on which InterSystems IRIS and IRIS for Health 2020.2 are supported for production and development are detailed in the [Supported Platforms document](#).
