ObjectScript for VS Code - Icon doesn't display in VS Code Panel

I'm working with VS Code on Centos 8. When I install the ObjectScript extension the installation succeeds, but the InterSystems icon never appears in the left-side panel. I can change settings for the extension - set the server info, etc. No errors show-up in the VS Code debug log.

UPDATE: the same thing happens on MacOS when using VS Code 1.46.1 and InterSystems ObjectScript extension 0.8.6

Can anyone suggest next steps for me to troubleshoot? Is there another log I should check?

VS Code version:

Version: 1.46.1

Commit: cd9ea6488829f560dc949a8b2fb789f3cdc05f5d

Date: 2020-06-17T21:13:08.304Z

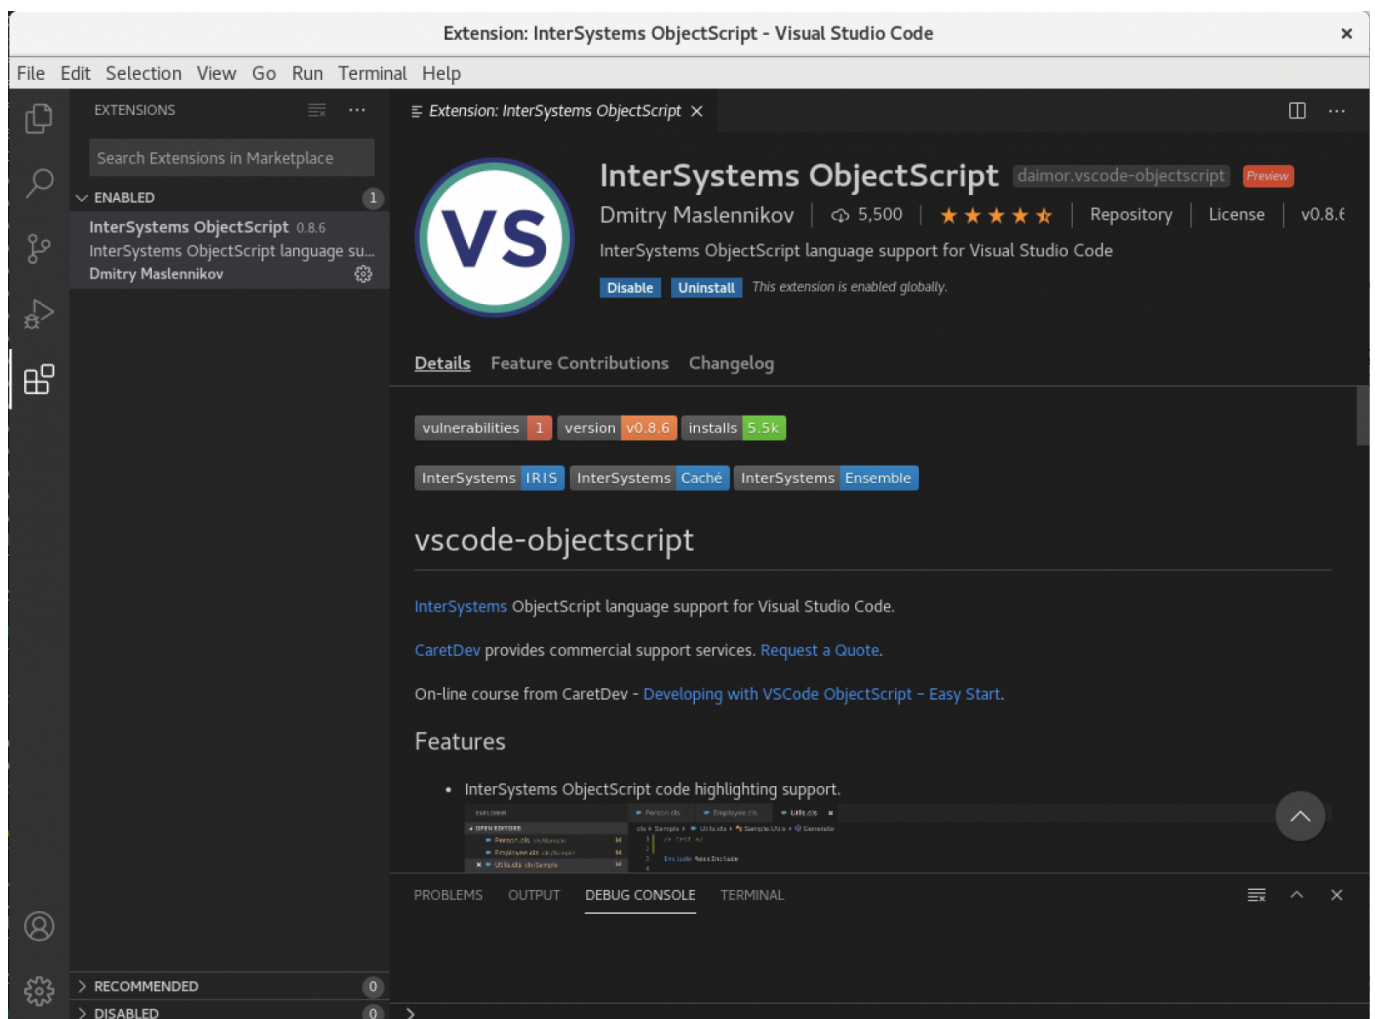

Electron: 7.3.1

Chrome: 78.0.3904.130

Node.js: 12.8.1

V8: 7.8.279.23-electron.0

OS: Linux x64 4.18.0-193.el8.x86_64
