No rows returned - [Cache ODBC][State : HYC00][Native Code 469]

Hi,

I get this error [Cache ODBC][State : HYC00][Native Code 469] and zero rows returned with the following query.

```
SELECT "Timestamp","Skillset" FROM "dbo"."iSkillsetStat"  
WHERE (Timestamp >= '2020-06-29 00:00:00'  
AND Timestamp < '2020-06-30 00:00:00')
```

I'm using Qlik Attunity Replicate to extract data, the query was formatted by the tool. The query will return data in excel and SSIS, but not using Replicate.

So far I've tried using two ODBC drivers

Driver Name: CacheODBC64.DLL
Unicode Client Version: 2017.2.2.865.0
Compiled at: Jun 25 2018 10:31:42
ODBC Version: 02.50
Locale Setting: English_United Kingdom.1252

Driver Name: CacheODBC3564.DLL
Unicode Client Version: 2017.2.2.865.0
Compiled at: Jun 25 2018 10:32:27
ODBC Version: 03.51
Locale Setting: English_United Kingdom.1252

Here's hoping someone can help with this issue

Regards,

Dave
