New Podcast: Empowering Users Through Chat

In Episode 12 of Data Points, we took a slightly different approach! Hear insights from three different guests — Jenny Ames, Gary Maggiolino, and Joey Moritz — about the creation of the all-new chat feature found on multiple InterSystems sites. You can see the chatbot in action on both the Getting Started site and all InterSystems IRIS or IRIS for Health pages on the InterSystems corporate site.

Have any topics you've been wanting to hear discussed on Data Points? Leave them in the comments and we can try to work those topics into upcoming episodes!
