Backspace in WebTerminal

I try to run a small test routine (guessing a random number) in WebTerminal but the result looks broken. in IRISterminal:

USER>d ^guess

```

1      .>.....*..   guess [0..9]: 1
2      ..>.....*.   guess [0..9]: 2
3      .....       guess [0..9]: █ !no number

```

in WebTerminal:

```

USER > d ^guess
1      .>...*....   guess [0..9]: 1
2      ..>.....*   guess [0..9]: 2
3      .....       guess [0..9]: a !no numberb !no numberc !no number

```

I think it relates to backspace. Is there some special setting required?

The code:

```

a
s q="..... guess [0..9]: "
f i=1:1 d b if p w ! w $c(9),"thank you",! q
q
b
w !,i,$c(9),q
f r v#1 q:(v?.ln) w " !no
number", $c(8,8,8,8,8,8,8,8,8,8)
w " "
s r=$R(10),p=$s(v="":1,v=r:"!",v>r:"<",1:">")
s x=q,$e(x,r+1)="*", $e(x,v+1)=$s(v=r:"!",v>r:"<")
,1:">")
q:p w $c(13),$c(9),x s p=v=r q

```

Backspace in WebTerminal
