

SQL CREATE TRIGGER command - SQLCODE: <-300>:

[craig jackson](#) · Jul 12, 2020

[#SQL](#) [#Caché](#)

Hello, I am running into a little problem.

I am trying to create a Cache Trigger on a FACS table using the SQL CREATE TRIGGER command but I am getting the message [SQLCODE: <-300>:<DDL not allowed on this table definition>].

I am not creating a persistent class but using the SQL CREATE TRIGGER command.

Please advise.

thanks.
