Getting Fatal error in Date Column in cache db

Hi,

I am getting below error in date column in a table. I am unable to query data or find distinct or tochar on this column.

Select distinct column name from table

Select column name from table

Select ToChar(column name) from table

Table has 3923509 rows.

Could someone help me how can I identify bad data in this table?

Any idea how we can avoid this error?

[SQLCODE: :]

[Cache Error: <%0AmBs1+1^%sqlcq.SMTKTUAT.cls498.1>]

[Location:]

[%msg: %0AmBs1+1^%sqlcq.SMTKTUAT.cls498.1>]
