What topics would you enjoy hearing covered in a podcast?

Hi Community! Many of you have seen the [Data Points](#) podcast episodes that we have been releasing since February. I mentioned previously that I planned to pose an open question to the community about topics you might like to hear in a podcast episode. Let us know in the comments if there are any conversation points you would find particularly interesting, and we can try to include some conversations with experts on said topics!

And in case you missed it, check out Episode 12 about the all-new chat bot on InterSystems websites!
