RxMx is a fast-growing company at the intersection of technology and healthcare. Founded by four specialist physicians, our driving philosophy is developing medical systems that ensure the safe delivery of complex and sophisticated medicines, with minimal burden on both physicians and patients. We supply innovative technology solutions to our pharmaceutical clients that improve patient safety, reduce the complexity in drug launch and provide a platform for real world data.

We are looking for a Software Engineer to enhance, maintain and support new and existing software products and solutions. This role will work closely with clinical staff and product managers to product requirement specifications and work closely with other developers and QA Engineers to product high quality working software.

Essential Functions:

- Participate in SDLC that leverages best practice and supports the design and delivery of sophisticated clinical applications.
- Support the conversion of business systems and functional requirements into working software in established timelines and using best practices.
- Work with clinical staff and product managers to produce requirement specifications and establish timelines for delivery.
- Proactive and create thinking to problem solving to develop out of the box products. As well as Enhancing, maintaining, and supporting existing solutions.
- Create and maintain appropriate documentation for software produced.
- Correct errors by making appropriate changes and then rechecking the program to ensure that the desired results are produced.
- Conduct trial runs of programs and software applications to be sure they will produce the desired information and that the instructions are correct.
- Compile and write documentation of program development and subsequent revisions, inserting comments in the coded instructions so others can understand the program.
- Clearly communicate and consult with managerial, engineering, and technical personnel to clarify program intent, identify problems, and suggest changes.
- Conduct code reviews, and approve or reject pull requests.
- Participate in capacity planning, assignment of work, team meetings and stand ups.

Qualifications:

- Degree in Computer Science or related technical field and/or 5+ years of related practical work experience.
- Experience with source control. BitBucket experience beneficial.
- Experience with Atlassian tools such as JIRA and Confluence.
- Experience with Agile methodologies.
- Must be independent yet a team player with great communication skills.
- Must be a go-getter, that can make things happen in a high paced environment.

- Experience in Healthcare IT working with HL7 and other EMR and Lab integrations.
- Experience with full stack development, with Angular experience preferred.
- Experience with InterSystems technology is required.

To be successful in this role, you must have/be:

- Ability to effectively identify what is important and prioritize competing projects.
- Ability to problem solve in a resourceful and data-driven manner while working in a fast-paced, demanding environment.
- A self-driven, results-oriented problem solver with a positive outlook.

We are proud of our collaborative culture and our dedicated team driven to improve treatment options for patients. Our company offers great benefits including flexible hours, remote work, and fun perks such as an extra vacation day on your birthday. While our offices are in Sydney, New York, and Berlin, we maintain the atmosphere of a small, close-knit company with employees who enjoy being social.

Further information on our company background and mission can be found at: <https://rxmxcorp.com/>

RxMx, Inc. provides equal employment opportunity to all individuals regardless of their race, color, creed, religion, gender, age, sexual orientation, national origin, disability, veteran status, or any other characteristic protected by federal, state or local law.
