InterSystems Ensemble/Health Connect Developer Required

We have an immediate requirement for an experienced Intersystems Ensemble/Health Connect consultant to join our team with a good grounding in OO Programming, Healthcare Integration and at least 2 years experience with InterSystems Ensemble/Healthshare Health Connect

The InterSystems Ensemble/Health Connect Consultant will be expected to go on to client sites, identify their needs and recommend how and what they should do in order to improve their business. From there you will then be expected to implement the services where required and provide documentation or training to compliment this.

The successful candidate will have the ability to take ownership of technical projects, deal with any issues and see them through to completion. This will require excellent communication and management skills as well as a strong hands-on background in Healthcare Integration.

This is an opportunity to play a key role in a growing business with real authority to make a difference along the way.

Key skills

2 years InterSystems Ensemble/Healthshare Health Connect Experience

BS or MS in Computer Science or equivalent (Physics, Mathematics, Sciences)

Software Development experience with Java, J2EE, JMS

Ability to identify, analyze, discuss and confirm application/system requirements from customers and relevant stakeholders and produce detailed specifications

Have sound understanding and experience with Information Technology and Systems and associated processes (development life cycle, testing processes, support, etc.)

Good communication skills, (oral, verbal and written), with the ability to produce clear concise documentation, which is easily understood by developers and customers

Experience with Application software testing and preparation of test plans and test data

Knowledge of standard industry processes and methodologies (eg, for implementation, enhancement requests, development and product release, change control, customer support)

Understand principles of Project Management and possession of core Project Management skills

Proficient in Microsoft Office suite, Email, Internet Explorer as well as Unix

A good understanding of the business issues within a specific domain such as banking, healthcare and retail

Experience with other Middleware technologies (SOA & BPM) such as Mulesoft, SeeBeyond, JCAPS, WebMethods will be highly advantageous in this role

Any experience working with MUMPS and Cache would also be beneficial
